

# **SAFETY DATA SHEET**

CETOL HLS PLUS (VOC2010) 006

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name

: CETOL HLS PLUS (VOC2010) 006

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|              | Identified uses      |  |
|--------------|----------------------|--|
| Consumer use |                      |  |
|              | Uses advised against |  |
| None         |                      |  |
|              |                      |  |

Product use

: Solvent borne coating for exterior use.

#### 1.3 Details of the supplier of the safety data sheet

Akzo Nobel Decorative Coatings, Wexham Road, Slough, Berkshire, United Kingdom, SL2 5DS, Tel.: +44 (0) 333 222 70 70 www.sikkens.co.uk

e-mail address of person : sikkens.advice@akzonobel.com responsible for this SDS

#### 1.4 Emergency telephone number

#### National advisory body/Poison Center

**Telephone number** : +44 (0)344 892 0111

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Aquatic Chronic 3, H412

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

| Signal word                    | : No signal word. |             |           |
|--------------------------------|-------------------|-------------|-----------|
| Date of issue/Date of revision | : 16-4-2025       | Version : 2 |           |
| Date of previous issue         | : 26-1-2024       | 1/17        | AkzoNobel |

| <b>SECTION 2: Hazards</b>   | SECTION 2: Hazards identification |   |  |
|---|-----------------------------------|---|--|
| Hazard statements   | :                                 | H412 - Harmful to aquatic life with long lasting effects.   |  |
| Precautionary statements  |                                   |   |  |
| General   | :                                 | P102 - Keep out of reach of children.<br>P101 - If medical advice is needed, have product container or label at hand.                 |  |
| Prevention  | :                                 | P273 - Avoid release to the environment.  |  |
| Response  | :                                 | Not applicable.   |  |
| Storage   | :                                 | Not applicable.   |  |
| Disposal  | :                                 | P501 - Dispose of contents and container in accordance with all local, regional, national or international regulations.               |  |
| Supplemental label<br>elements  | :                                 | Repeated exposure may cause skin dryness or cracking.<br>Contains 3-iodo-2-propynyl butylcarbamate. May produce an allergic reaction. |  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :                                 |   |  |
| Special packaging requirem  | en                                | <u>ts</u>   |  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :                                 | Not applicable.   |  |
| Tactile warning of danger   | :                                 | Not applicable.   |  |
| 2.3 Other hazards   |                                   |   |  |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :                                 | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |  |
| Other hazards which do not result in classification   | :                                 | None known.   |  |

## **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a physical, health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if easy to do. Continue to rinse for at least 10 minutes. Get medical attention.  |
|----------------------------|---|--|
| Inhalation                 | : | Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband.   |
| Skin contact               | : | Wash skin thoroughly with soap and water or use recognized skin cleanser.<br>Remove contaminated clothing and shoes. Get medical attention if symptoms occur.<br>Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                  | : | Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.   |

#### 4.2 Most important symptoms and effects, both acute and delayed

| <u>Over-exposure signs/sym</u> | <u>ptoms</u>  |                        |

| SECTION 4: First aid measures                     |   |  |
|---|---|--|
| 4.3 Indication of any immedi                      | ate medical attention and special treatment needed  |  |
| Notes to physician                                | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |  |
| Specific treatments                               | : No specific treatment.  |  |
| SECTION 5: Firefigh                               | ting measures   |  |
| 5.1 Extinguishing media                           |   |  |
| Suitable extinguishing media                      | : Use an extinguishing agent suitable for the surrounding fire.   |  |
| Unsuitable extinguishing media                    | : None known.   |  |
| 5.2 Special hazards arising f                     | rom the substance or mixture  |  |
| Hazards from the substance or mixture             | In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is harmful to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain.  |  |
| Hazardous combustion products                     | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |  |
| 5.3 Advice for firefighters                       |   |  |
| Special protective actions for fire-fighters      | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without<br>suitable training.   |  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |  |

#### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures : No action shall be taken involving any personal risk or without suitable training. For non-emergency Evacuate surrounding areas. Keep unnecessary and unprotected personnel from personnel entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. **For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". 6.2 Environmental : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused precautions environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

#### 6.3 Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br/>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br/>material and place in an appropriate waste disposal container. Dispose of via a<br/>licensed waste disposal contractor.

| Date of issue/Date of revision | : 16-4-2025 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 26-1-2024 | 4/17        | AkzoNobel |

#### **SECTION 6: Accidental release measures**

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. |
|---------------------------------|---|
| 6.4 Reference to other sections | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>   |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance.

#### 7.1 Precautions for safe handling

| Protective measures                    | • Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Avoid<br>release to the environment. Keep in the original container or an approved alternative<br>made from a compatible material, kept tightly closed when not in use. Empty<br>containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

| 7.3 Specific | end | use(s) |
|--------------|-----|--------|
|--------------|-----|--------|

| Recommendations                      | : Not available. |
|--------------------------------------|------------------|
| Industrial sector specific solutions | : Not available. |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values   |
|-------------------------|---|
| n-butyl acetate         | EH40/2005 WELs (United Kingdom (UK), 1/2020).<br>STEL: 966 mg/m <sup>3</sup> 15 minutes.<br>STEL: 200 ppm 15 minutes.<br>TWA: 724 mg/m <sup>3</sup> 8 hours.<br>TWA: 150 ppm 8 hours. |

## **SECTION 8: Exposure controls/personal protection**

| Recommended monitoring<br>procedures | : If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to monitoring standards, such as<br>the following: European Standard EN 689 (Workplace atmospheres - Guidance for<br>the assessment of exposure by inhalation to chemical agents for comparison with<br>limit values and measurement strategy) European Standard EN 14042 (Workplace<br>atmospheres - Guide for the application and use of procedures for the assessment<br>of exposure to chemical and biological agents) European Standard EN 482<br>(Workplace atmospheres - General requirements for the performance of procedures<br>for the measurement of chemical agents) Reference to national guidance<br>documents for methods for the determination of hazardous substances will also be |
|--------------------------------------|---|
|                                      | required.   |

#### **DNELs/DMELs**

| Product/ingredient name          | Туре  | Exposure                | Value                  | Population            | Effects   |
|----------------------------------|-------|-------------------------|------------------------|-----------------------|-----------|

#### PNECs

No PNECs available.

#### 8.2 Exposure controls

| SECTION 8: Exposu                | re controls/personal protection   |
|----------------------------------|---|
| Appropriate engineering controls | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
| Individual protection meas       | ires  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated.                                     |
|                                  | When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time >480 minutes according to EN374) is recommended. Recommended gloves: Viton ® or Nitrile, thickness $\geq$ 0.38 mm. When only brief contact is expected, a glove with protection class of 2 or higher (breakthrough time >30 minutes according to EN374) is recommended. Recommended gloves: Nitrile, thickness $\geq$ 0.12 mm. Gloves should be replaced regularly and if there is any sign of damage to the glove material.   |
|                                  | The performance or effectiveness of the glove may be reduced by physical/ chemical damage and poor maintenance.   |
|                                  | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |
| Body protection                  | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.   |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Wear a respirator conforming to EN140 with type A/P2 filter or better. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation suitable respiratory protective equipment should be used. |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                                       |  |

## **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

#### Acute toxicity

| Product/ingredient name             | Result                          | Species      | Dose        | Exposure |
|-------------------------------------|---------------------------------|--------------|-------------|----------|
| n-butyl acetate                     | LD50 Oral                       | Rat          | 10768 mg/kg | -        |
| 3-iodo-2-propynyl<br>butylcarbamate | LC50 Inhalation Dusts and mists | Rat          | 0.68 mg/l   | 4 hours  |
|                                     | LD50 Dermal                     | Rabbit       | >2000 mg/kg | -        |
|                                     | LD50 Oral                       | Rat - Female | 1056 mg/kg  | -        |

**Conclusion/Summary** : Not available.

|                                |                     |             |           |

CETOL HLS PLUS (VOC2010) 006

## **SECTION 11: Toxicological information**

| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking |
|--------------|--|
| Ingestion    | : No specific data.  |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>     |   |                |
|--------------------------------|---|----------------|
| Potential immediate<br>effects | : | Not available. |
| Potential delayed effects      | : | Not available. |
| Long term exposure             |   |                |
| Potential immediate<br>effects | : | Not available. |
| Potential delayed effects      | : | Not available. |

#### Potential chronic health effects

| Product/ingredient name             | Result   | Species                  | Dose                   | Exposure               |
|-------------------------------------|--|--------------------------|------------------------|------------------------|
| 3-iodo-2-propynyl<br>butylcarbamate | Sub-chronic NOAEL Dermal                       | Rat                      | 200 mg/kg              | 90 days                |
|                                     | Sub-acute NOAEL Oral                           | Rabbit - Male,<br>Female | 13 mg/kg               | -                      |
|                                     | Chronic NOAEL Oral                             | Rat                      | 20 mg/kg               | 2 years                |
|                                     | Sub-chronic NOAEL Oral                         | Rat                      | 35 mg/kg               | 90 days                |

| inogenicity : I | No known significant effects | or critical hazards. |
|-----------------|------------------------------|----------------------|
|-----------------|------------------------------|----------------------|

| Mutagenicity | : No known significant effects or critical hazards. |
|--------------|---|
|--------------|---|

**Reproductive toxicity** : No known significant effects or critical hazards.

#### 11.2 Information on other hazards

#### 11.2.1 Endocrine disrupting properties

Not available.

#### 11.2.2 Other information

No additional information.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

## **SECTION 12: Ecological information**

| Product/ingredient name             | Result                            | Species   | Exposure |
|-------------------------------------|-----------------------------------|---|----------|
| n-butyl acetate                     | Acute LC50 32 mg/l Marine water   | Crustaceans - Artemia salina  | 48 hours |
| -                                   | Acute LC50 62000 µg/l Fresh water | Fish - Danio rerio  | 96 hours |
| 3-iodo-2-propynyl<br>butylcarbamate | Acute EC50 956 ppb Fresh water    | Daphnia - Daphnia magna   | 48 hours |
|                                     | Acute EC50 0.16 ppm Fresh water   | Daphnia - Daphnia magna   | 48 hours |
|                                     | Acute LC50 500 ppb Fresh water    | Crustaceans - Hyalella azteca   | 48 hours |
|                                     | Acute LC50 2920 ppb Marine water  | Crustaceans - Neomysis<br>mercedis - Adult                                    | 48 hours |
|                                     | Acute LC50 40 ppb Fresh water     | Daphnia - Daphnia magna   | 48 hours |
|                                     | Acute LC50 95 ppb Marine water    | Fish - Oncorhynchus kisutch -<br>Juvenile (Fledgling, Hatchling,<br>Weanling) | 96 hours |
|                                     | Acute LC50 100 ppb Fresh water    | Fish - Oncorhynchus mykiss -<br>Juvenile (Fledgling, Hatchling,<br>Weanling)  | 96 hours |
|                                     | Acute LC50 72 ppb Fresh water     | Fish - Oncorhynchus mykiss  | 96 hours |
|                                     | Acute LC50 67 ppb Fresh water     | Fish - Oncorhynchus mykiss  | 96 hours |
|                                     | Acute LC50 67 µg/l Fresh water    | Fish - Oncorhynchus mykiss -<br>Juvenile (Fledgling, Hatchling,<br>Weanling)  | 96 hours |
|                                     | Chronic NOEC 8.4 ppb              | Fish - Pimephales promelas  | 35 days  |

Conclusion/Summary

: Not available.

#### 12.3 Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| n-butyl acetate         | 2.3    | -   | low       |

| 12.4 Mobility in soil                     |                  |
|---|------------------|
| Soil/water partition<br>coefficient (Koc) | : Not available. |
| Mobility                                  | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

| Date of issue/Date of revision | : 16-4-2025 | Version : 2 |           |
|--------------------------------|-------------|-------------|-----------|
| Date of previous issue         | : 26-1-2024 | 12/17       | AkzoNobel |

## **SECTION 12: Ecological information**

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| <u>Product</u>          |   |
|-------------------------|---|
| Methods of disposal     | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste         | : The classification of the product may meet the criteria for a hazardous waste.  |
| Disposal considerations | : Do not allow to enter drains or watercourses.<br>Dispose of according to all federal, state and local applicable regulations.<br>If this product is mixed with other wastes, the original waste product code may no<br>longer apply and the appropriate code should be assigned.<br>For further information, contact your local waste authority.  |

#### European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code              | Waste designation   |  |  |  |
|-------------------------|---|--|--|--|
| EWC 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances   |  |  |  |
| Packaging               |   |  |  |  |
| Methods of disposal     | : The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |  |  |  |
| Disposal considerations | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers.<br/>Empty containers must be scrapped or reconditioned.<br/>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions.</li> </ul> |  |  |  |
| Special precautions     | This material and its container must be disposed of in a safe way. Care should be<br>taken when handling emptied containers that have not been cleaned or rinsed out.<br>Empty containers or liners may retain some product residues. Avoid dispersal of<br>spilled material and runoff and contact with soil, waterways, drains and sewers.                  |  |  |  |

## **SECTION 14: Transport information**

|                                    | ADR/RID          | IMDO           | 3         |

#### Notice to reader

IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
